

LEONARD ADJEI

Front-End Developer

I am a devoted and detail-oriented developer with a deep interest in problem-solving. I am eager to showcase my value and ready to learn attitude in a company with a global reach.

Projects

Password Generator

Users can generate passwords which include all characters on the keyboard. They can also set the number of characters they want the length of the password to be. Created with html5, css3 and vanilla js.

Expense Tracker

This project was created using html, flexbox and JavaScript. Users can enter a name, date and amount spent. It then logs the input values in a table after a button is clicked.

Intro Page Front-end Mentor Challenge

A responsive website which displays the use of dropdown navigation menus using CSS media queries for responsiveness, HTML for structure and JavaScript for functionality.

Work History

Anti-money Laundering Analyst at *Vodafone* (2020 – present)

Monitor transactions of Vodafone cash customers, KYC screening and watchlist monitoring using Dow Jones and Siron.

I.T Officer at *Electricity Company of Ghana* (2018 – 2019)

Installation of Lan and Wan, monitored network antennas using Winbox, provided I.T support services using NetSupport and performing maintenance on IT infrastructure.
